MOTIVASI BELAJAR SISWA PADA MATA PELAJARAN PENDIDIKAN PANCASILA  
DAN KEWARGANEGARAAN**

***ABSTRACT***

*In this era of globalization, the world of education is still complicated by the lack of interest or student learning motivation that tends to impact student learning outcomes. There is several problems that affect student motivation, one of which is a model learning where this problem comes from the teacher, who is less creative in depth the use of learning models. Such as lesson planning, implementation learning, student learning motivation to student response. The purpose of this study is to know the lesson preparation plan, to know the implementation learning, to determine the increase in motivation to learn, and to determine the response students. This study uses a case study method with a qualitative approach do at SMKN 15 Bandung with research subjects are teachers of PPKn subjects and class X Multi Media students. Data collection techniques are based on observations, interviews and photo documents, while data processing uses data reduction, presentation of data and conclusions. From the results of case study research with the approach qualitataif who are implemented with the picture and picture model has increased or in say successful with many students who participate actively in the learning process teaching that is carried out in class. It can be concluded that the model picture and picture learning can increase student motivation in class X Multi Mdeia SMKN 15 Bandung.*
